

main.c

Run

Output

```
1  #include <stdio.h>
2  int main()
3  {
4      int index[50], n, i, block;
5      printf("Enter number of file blocks: ");
6      scanf("%d", &n);
7      printf("Enter block numbers: ");
8      for(i = 0; i < n; i++)
9          scanf("%d", &index[i]);
10     printf("\nIndex Block:\n");
11     for(i = 0; i < n; i++)
12         printf("Index %d -> Block %d\n", i + 1, index[i]);
13     printf("\nEnter block number to access: ");
14     scanf("%d", &block);
15     for(i = 0; i < n; i++)
16     {
17         if(index[i] == block)
18         {
19             printf("Block %d found at Index %d\n",
20                 block, i + 1);
21             return 0;
22         }
23     }
24     printf("Block %d not found\n", block);
25     return 0;
26 }
```

Enter number of file blocks: 6
Enter block numbers: 12 24 36 48 60 72

Index Block:
Index 1 -> Block 12
Index 2 -> Block 24
Index 3 -> Block 36
Index 4 -> Block 48
Index 5 -> Block 60
Index 6 -> Block 72

Enter block number to access: 60
Block 60 found at Index 5
